

MAVA 350 DECONTAMINATION SHOWER

MAVA350 is a portable decontamination shower specially designed for rapid field operations.

MAVA350 is used for immediate personnel and protective gear decontamination in CBRN related incidents. The users are typically Defence Forces, Fire Brigades, Industrial Plants, Civil Defence operators and other First Responders.

MAVA350 Decontamination shower is modular, light, durable, portable and easy to use unit. Shower is easy to carry and it can be built up in few minutes.

Water usage is controlled by practical foot switch. A separate Hand Shower is included for detailed cleaning. Integrated water bags in curtains keep shower steady in heavy wind. Contaminated water can be collected with submersible pump. Seven (7) nozzles + hand shower washes the person in few seconds.

Construction:

- Shower unit: Aluminium pipe work is packed into aluminium briefcase (1200x450x200). Pipes are rapidly connected with stainless steel speed locks.
- Tent: Glass fibre toughened composite framework. PVC pool and PVC curtains are connected with polypropylene speed locks. Tent is packed into PVC bag (1800x700x200).

Technical Features	
Dimensions	2200 * 1600 * 1600 mm
Total weight	57 kg
